Beyond Your Vision

BLOCKCHAIN PORTFOLIO

Unlocking the Future with Blockchain-Powered Solutions: Our exceptional suite of applications harnesses the potential of blockchain technology to revolutionize the way you access services.
Welcome to the future of innovation and security

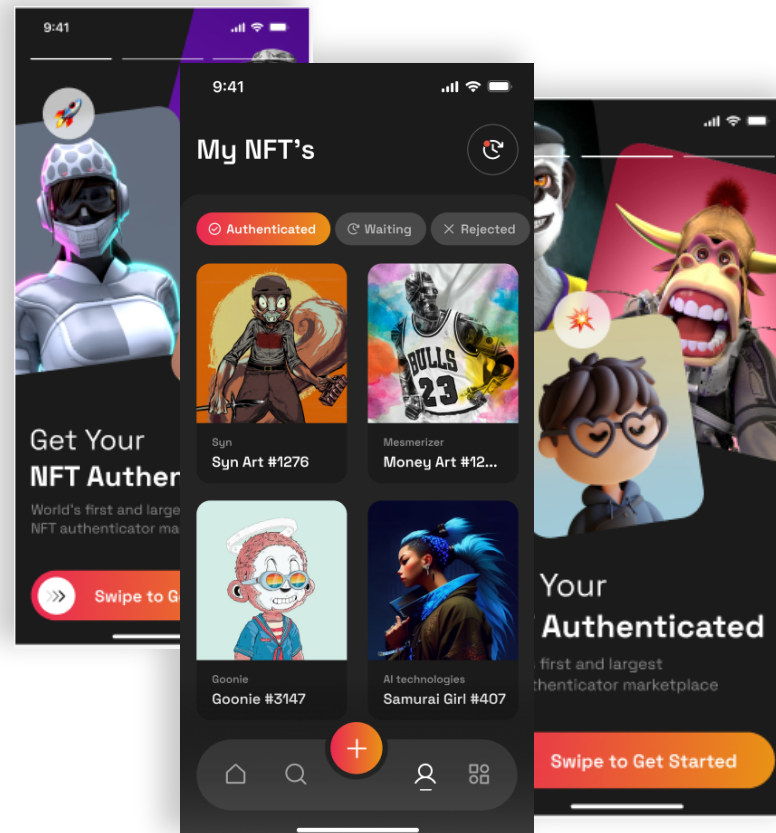

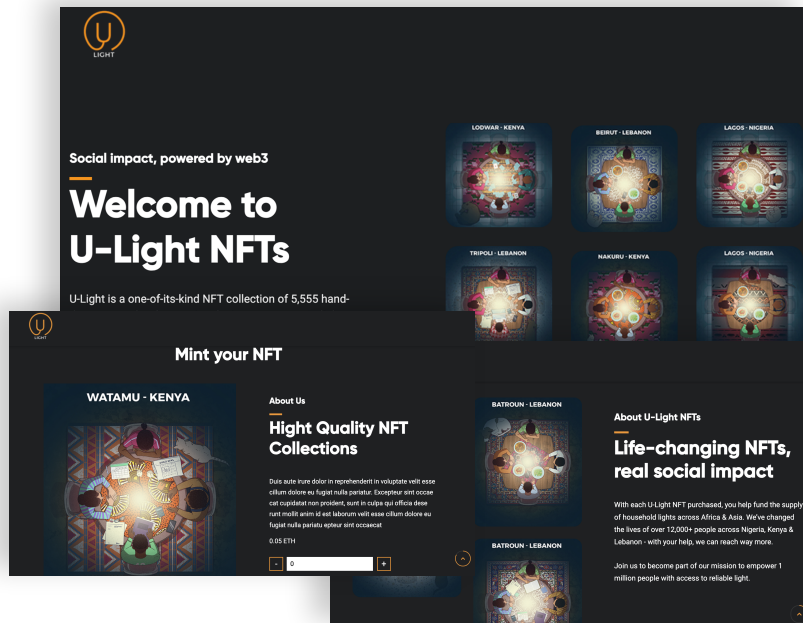

Ulights

U-Light is a one-of-its-kind NFT collection of several hand-drawn artworks showcasing the impact access to light can have on families living without electricity worldwide, with 100% mint & royalty contribution going towards fighting energy poverty.

This project focuses on generating NFTs and minting them, which further generates revenue.

This is a web-application which is built using node.js services for blockchain and solidity contracts for deploying and minting the NFTs.

ReactJS NodeJS Solidity

NFT Auth

NFT Auth is a platform from where you can submit and verify your NFTs in exchange for a calculated amount. The NFTs you submit and the payments you make are handled with strict privacy rules which makes it a safe platform to share your NFTs.

It is available as a mobile app which is built using React-Native, while it's server comprises of Django REST API.

React-Native Django

Restaurant App

The GoEat web application is a convenient way to order ahead for pickup, scan and pay in-store and customize your favorites. Rewards are built right in, so you'll earn Stars towards free drinks and food on your purchases.
